

Q. Analyse the Jason and the Golden Fleece episode.

Ans: Stories in Greek mythology are what make the Greek Gods, Goddesses, and demigods more memorable. Their adventures become the subject of many artists' work, and some even influenced traditions and terminology in the modern world. There is proof of some Greek mythological characters who existed in real life, but other stories and characters are more mythological and may not seem like more than fiction stories to most people. As the reader or viewer, you are the one who decides whether these tales are legend or fact.

The story of the Golden Fleece surrounds the Greek hero, Jason. Before we can get into his adventure, you must first learn who Jason was.

Jason was a character in Greek mythology who went on a quest with some of the mightiest heroes of his time, and it became one of the most famous stories in mythology. Their mission was to retrieve a golden fleece from the King Aetes of Colchis.

Pelias sent him on an impossible mission, to fetch the Golden Fleece from the King Aetes of Colchis. Jason did not refuse the order forwarded by Pelias, but instead assembled a fleet of heroes and warriors to help him on his journey. This group was the Argonauts.

Once Argo and its crew reached Colchis, they would have to get the Golden Fleece from Aetes, the King of Colchis. Aetes did not readily give up the Fleece since it was a gift to him. However, he did agree to hand the Golden Fleece over to Jason upon him completing a set of tasks. The first task was to plow a field using the Khalkotauri, which was two fire-breathing bronze-hooved bulls; for the second task, Jason had to plant dragon's teeth in the field he had plowed, and then defeat the stone warriors that sprouted from them.

The above analysis shows that the Golden Fleece was a ram that had hair that was made of gold. This was incredibly unique and rare, and this Golden Fleece came to represent everything that was royal and noble in Greek mythology.
